### Walla Walla Soft White Winter Wheat--Preliminary Data

1. Grain yield in the 2015 Walla Walla soft white winter wheat trial averaged 76 bushels/acre, significantly less than the five-year average. The Walla Walla nursery was located about 8 miles north of Walla Walla, WA (J. Beechinor, Cooperator). All yield values within the 10% LSD range of the highest yield are shown in bold.
2. This nursery was seeded on September 30, 2014 following chem-fallow at a seeding rate of 85#/acre.
3. A 4 oz./acre rate of Tilt was applied at the time of herbicide application and no stripe rust was observed at this location.
