HORSE HEAVEN HARD WINTER WHEAT – 2008 WSU VARIETY TESTING DATA

1. 2008 Hard Winter Wheat **YIELD DATA** from the WSU Variety Testing nursery at the Horse Heaven location averaged 20.7 bu/ac; about 51% below normal 3-yr average yields. *NOTE: The Horse Heaven nursery was located on Davis Rd (D. Roseberry farm).* This nursery was seeded on 15 October 2007 on summer fallow ground using a plot drill with double disc openers (6-inch spacing). Seeding rate was 45# per acre. The base fertilizer rate was 40#N per acre. March 2008 soil test analyses showed 147#N, 15#P and 8#S in a 4-foot soil profile.
2. Wheat quality in terms of **test weight** averaged 59.3 lbs/bu. Individual plots did not produce a sufficient amount of grain to run test weight values individually, all 4 replicates were bulked together to obtain one value for each entry. Therefore, no analysis was done for test weight and values for C.V. and LSD are not included.
3. **Percent grain protein** had a range of 13.4% to 15.7% with an average of 14.4%.
