PowerFlex, Ally, 2,4-D, Aproach (fungicide)
 applied at herbicide timing; Second fungicide
 application via air

Trial Notes:

1. The Connell nursery was located about 8 miles east of Connell, WA. All yield, test weight, and protein values within the 5% LSD range of the highest value are shown in bold.
2. We had to plant pretty deep to hit moisture at this location last fall. Emergence varied and is noted in the "Spring Stand" rating (1 to 9 scale where 9 is the best).
3. Because of the deep planting, there was a fair amount of plot-to-plot variation in yield.
